

Lagun®

Maximize your living space

Unleash the Efficiency of Space with LAGUN

Embark on a journey to maximize your living space with LAGUN, the innovative table and stand system crafted to seamlessly adapt to your dynamic lifestyle.

Born from the ingenuity of Swedish inventor Magnus Olsson, LAGUN's roots trace back to the 1980s, nurtured by a rich heritage of metalworking in the heart of Sweden's Bergslagen region. Here, in the cradle of Swedish iron and steel, Magnus envisioned a solution to optimize space in confined environments like RVs, boats, and tiny homes.

Inspired by similar swiveling concepts pioneered in the 1920s, Magnus embarked on a mission to elevate these concepts to new heights. Drawing upon his knowledge of aluminum extrusion and ingenious technical solutions like the dovetail track and machine handles, he transformed LAGUN into a marvel of functionality and Scandinavian design.

LAGUN – where space meets versatility, innovation meets functionality, and Swedish ingenuity meets your lifestyle.
